7. Proposed System Description

7.1 Objective

The purpose of this proposal is to present the design, manufacturing, installation, commissioning, testing, and acceptance testing of the Telescopic Belt Conveyor & Dynamic profiler as per Flipkart's requirements.

7.2 Summary of the System

Process flow of the System

Infeed System: - The Shipments will be loaded on telescopic belt conveyor, then these shipments will proceed to Dynamic profiler for further process..

Profiling: - The resource will orient the shipment such that barcode always faces the scanner (Top Side only). The shipment passes through the automatic barcode scanning tunnel where the barcode data is read, the weight, dimensions and image are captured and stored in the system. The system then passes on to the output conveyor.

Exception Handling: - In case of over weight & over dimension parcel, tower light indicates the error & the conveyor stops, Operator is expected to remove the parcel from the output conveyor & handle it manually outside the system.
